Step 4: Click on Editor in the menu bar and choose Stupeflix Editor

Editor Blog About

Stupeflix Editor
XML Editor

Step 5: photos and background music

The screenshot shows the Stupeflix Editor interface. At the top left is the logo "Stupeflix Editor" with a "beta" tag. A navigation bar contains "Editor", "Blog", and "About". The main workspace is a dotted grid titled "The Inuit Experience". On the left, a vertical panel contains five image thumbnails, each with a "+" sign and a caption box: "The Inuit Tribe of North America", "SOL USI. 3a-b", "The Inuit lived in a harsh, cold, cli", "Temperature are below freezing f", and "The Inuit inhabit present day Alas". On the right, a music track "Ayres Rock.mp3" is added to the timeline. At the bottom, there are buttons for "Add Images", "Clear All", and "Show help".

drag images here to create a new group

The Inuit Experience

+ Ayres Rock.mp3

Click on the + sign to add background music. A great source of free music downloads can be found at:
www.freeplaymusic.com

Click on the + sign to add a caption to the photo.

Simply drag and drop photos to move them.

Click here to upload images

Add Images Clear All Show help

Step 6: When you have finished editing your video click on **Generate the video**

(You can tweak transitions and timing by opening the XML editor, but it is not necessary)

Step 7: Choose your video format and download your completed video.

A dialog box titled "Select the video profile you want:" with a "hide" link in the top right corner. It contains three radio button options: "Iphone Video" (480x320 h264 encoded video with aac audio (.mp4)), "Quicktime Video" (640x480 h264 encoded video with aac audio (.mp4)), and "Flash Video" (640x480 flash video (.flv)). Below these is a checkbox labeled "Send me an email when my video is ready!". At the bottom right are "Cancel" and "Launch generation" buttons.
